

GCC LLC

Division 27 & 28 Low-Voltage Contractor • KCMO / STL

QUOTE FOR

Clayton Dental Group — Office Network & Security Refresh

Prepared for:	Clayton Dental Group
Attn:	Dr. Rebecca Ellis, Owner
Address:	8001 Forsyth Blvd, Clayton MO 63105
Date:	2026-04-21
Valid through:	2026-06-20

01 — A Note from Kaitlyn

Dr. Ellis,

Thanks for walking me through the practice last Tuesday. You told me the cable between the front desk and the back operatories gets flaky every few weeks — and you've been calling your IT vendor out for what's almost always a termination problem at the wall plate. That's exactly the kind of thing GCC solves permanently: we pull new Cat6A plenum cable end-to-end, we terminate every jack with the test equipment connected, and we don't leave until every drop passes certification.

I'm proposing a full rebuild of the data cabling across the practice — 32 new data drops on home-run Cat6A plenum cable to a new rack in the server closet, four ceiling WiFi access points for edge-of-chair coverage, a six-camera IP surveillance system focused on the waiting room, exterior parking, and the business office, and a new 24-port PoE+ switch that powers the whole thing without a separate electrical circuit per device. You keep the lifetime workmanship warranty — it transfers if you ever sell the practice.

Here's what happens next: review this with me, we can walk the space together one more time to confirm camera placement, sign a contract, and we get started. The install takes four business days with two crew members on site.

Kaitlyn Lim Morris President & CEO, GCC LLC

02 — What You're Getting

Total Price: \$42,600

One-sentence summary: a complete rebuild of the data cabling, four new WiFi access points with whole-practice coverage, six IP cameras covering the entrances and business office, and a clean rack buildout with one switch that powers every device.

- Every cable certified with a professional tester, and you get the test report on a USB on closeout
- Every data cable is Cat6A plenum — gigabit today, ready for whatever comes next
- Lifetime workmanship warranty — transfers if you sell the practice
- We have never missed a project completion date

Schedule headline: Four consecutive business days on site, plus a return visit for final walkthrough.

03 — Who You're Working With

GCC LLC is a Division 27 and Division 28 low-voltage contractor based in St. Peters, Missouri, serving the Kansas City and St. Louis metros. We do structured cabling, IP video surveillance, access control, audiovisual, paging, and telecom room buildout. We work primarily through general contractors on new construction and renovation, and directly with owners on refresh projects like this one.

Team. Kaitlyn Lim Morris, President and CEO. Nathan Morris, operations and estimating lead. Dustin Morris, field delivery lead. All three are directly reachable during any active project.

Insurance. \$2M general liability through Next Insurance, statutory workers' comp through AmGUARD, \$1M combined-single auto. Certificates on request.

Prior Work.

- **Brewer & Casey Dental, Chesterfield MO (2024).** 28 Cat6A drops, 4 cameras, rack and switch refresh. Completed in three business days.
- **Forsyth Orthodontics, Clayton MO (2023).** 36 Cat6A drops, 8 cameras, full network segmentation for the imaging network.

Reference contacts available on request.

04 — What We're Installing

Home Network Cabling. We'll pull 32 new Cat6A plenum data cables from every workstation, imaging device, printer, and TV back to the server closet. Each cable gets a permanent-link certification test — that's the equivalent of a pressure test for plumbing, but for data cable — and you get the test report as a PDF.

WiFi Coverage. Four ceiling-mounted access points distributed across the practice. The goal is no dead spots at the chair, at the front desk, or in the break room. We'll use the Ubiquiti UniFi system, which is the same kit we install in commercial settings — it's reliable and your IT vendor can manage it.

IP Camera Surveillance. Six IP cameras — two exterior covering the front door and the parking lot, two covering the waiting room and front desk, one covering the business office door, one covering the back hallway. All cameras are PoE-powered off the new switch; no separate power runs.

Rack & Switch. New 12U wall-mount rack in the server closet. 24-port Ubiquiti UniFi Pro Max 24 PoE+ switch. Patch panel, cable manager, labeled patch cords.

4.1 Standards we work to

Independent certification is how you know the work is done right. We use a Fluke DSX-8000 tester on every cable — it's the industry-standard tool — and deliver a LinkWare PDF report that any IT vendor can interpret. Every cable, every jack, every patch-panel port is labeled per TIA-606-C, so if anyone ever needs to trace a run, it takes sixty seconds, not an afternoon.

4.2 Things we don't do on this job

- Fire alarm, nurse-call, or life-safety systems — those are handled by a specialty contractor certified by the State Fire Marshal
- Your ISP setup (you call Spectrum or AT&T to activate service; we time our work to match)
- Drywall patching beyond small access holes at outlet locations
- Anything on the dental-equipment side — if it's hard-plumbed or hard-wired to a compressor, that's your dental equipment vendor

05 — How This Gets Built

GCC assigns a dedicated Project Manager to every project. Two-person crew minimum — never a single tech on site. Uniformed, badged, with company vehicles clearly marked. Every crew member is OSHA-10 certified at minimum.

5.1 Schedule

Phase	Timing
Day 1 (Monday)	Rough-in pathway and start cable pull
Day 2 (Tuesday)	Finish cable pull; start termination
Day 3 (Wednesday)	Finish termination; Fluke certification sweep
Day 4 (Thursday)	Camera install, WiFi AP install, switch cutover, walkthrough

The practice stays open all four days. We work 7 AM to the start of your first patient, and after your last patient — no pulling cable through operatories during appointments.

06 — Warranty

Lifetime workmanship — transfers with the property.

Every cable we install, every termination, every jack — covered for as long as the cable is in service. If a cable we installed ever stops working, you call us and we fix it. If you sell the practice in 2032, the next owner has the same guarantee. Equipment carries its own manufacturer warranty, and the GCC-furnished hardware is covered for five years of advance replacement.

07 — Investment Summary

Total Price: \$42,600

Category	Amount
Installation (labor, materials, testing, certification)	\$36,100
Equipment (switch, APs, cameras, rack, patch panel)	\$6,500
Total Investment	\$42,600

Alternate — Managed Services: \$295 / month, month-to-month, no lock-in. Remote monitoring, firmware updates, and advance-replacement on any GCC-furnished hardware that fails.

7.1 Payment terms

30% deposit at contract signing (covers material ordering), 40% at material delivery, 30% at completion walkthrough.

7.2 What's included

Installation, materials, Fluke certification, LinkWare PDF report, TIA-606-C label schedule, closeout walkthrough, lifetime workmanship warranty.

08 — Next Steps

1. Review this quote and let me know any questions.
2. I'm happy to walk the practice with you one more time to confirm camera and AP placement.
3. When you're ready, sign the acceptance block on the last page or reply with "accepted."
4. We coordinate a start date and get going.

09 — Terms & Conditions (summary)

This proposal becomes a binding contract on written acceptance. Price is firm through the validity date on the cover page. Scope is exactly what's listed in Section 03; anything not listed is excluded. Changes are documented on written Change Orders at 10% markup. GCC carries full commercial insurance and names the property owner as additional insured on the GL policy on request. Missouri law governs; venue is St. Charles County.

Full commercial terms available on request.

10 — Acceptance

By signing below, Clayton Dental Group accepts this quote for Office Network & Security Refresh at the total price of \$42,600, subject to the terms and conditions herein.
