

Nathan Morris

Director of Operations — Green Communications Contracting LLC

Professional Summary

I bring 12+ years of healthcare IT infrastructure experience to GCC, having led or supported 600+ hospital projects across all 50 states. My background spans radiology and imaging workflow systems, network infrastructure, and large-scale technology deployments in mission-critical healthcare environments.

Role at GCC

-
- Lead all field operations, crew supervision, and quality assurance.
 - Manage project scheduling, material logistics, and site coordination.
 - Conduct daily safety briefings and site hazard assessments.
 - Oversee 100% Fluke certification testing on all installed links.
 - Serve as QA Manager for our QA/QC program.
 - Coordinate directly with GC superintendents and project managers on site.

Prior Experience — Healthcare IT Infrastructure (12+ Years)

-
- Led technology deployments at 600+ hospitals across all 50 states.
 - Managed radiology and imaging workflow system installations including PACS, RIS, and diagnostic workstations.
 - Coordinated with hospital IT departments, facilities teams, and general contractors.
 - Supervised crews in occupied healthcare environments with strict infection control and patient safety requirements.
 - Managed multi-site rollouts with simultaneous installations across multiple facilities.

Key Capabilities Transferred from Healthcare IT

-
- Mission-critical infrastructure installation in 24/7 occupied facilities.
 - Strict adherence to facility-specific safety protocols and access requirements.
 - Network infrastructure deployment (structured cabling, fiber, equipment racks).
 - Vendor coordination and equipment logistics at national scale.

- Quality documentation and project closeout in regulated environments.

Certifications & Training

- OSHA 30-Hour Construction Safety
- OSHA 10-Hour Construction Safety
- First Aid / CPR certified
- Aerial lift operator trained
- Fluke DSX-8000 / CertiFiber Pro certified operator
