

FINANCE SUMMARY

{{JOB NAME}} — {{GC NAME}} — {{SITE CITY, STATE}}

INTERNAL DOCUMENT — GCC EYES ONLY

Contains internal cost rates, margin analysis, and strategy. Never attach to a proposal, quote, or email to a GC, Owner, or Subcontractor.

PURPOSE

Internal margin and scenario analysis for this bid. Consolidates cost basis from the Master Catalog (Materials Sheet 2, Equipment Sheet 1, Services Sheet 3), labor hours from the Labor Plan, and soft costs. Drives the Base Bid submitted on the Bid Proposal and tracks margin against the 28-35% target. Reconciles with BTQ totals and Cable Schedule LF quantities.

This document never ships to the GC, Owner, or any subcontractor. All cost rates, margins, and scenario forecasts are GCC internal only.

1. Executive Snapshot

Metric	Value
Base Bid (submitted)	\${{BASE_BID}}
Total Cost (internal)	\${{TOTAL_COST}}
Gross Profit	\${{GROSS_PROFIT}}
Gross Margin %	{{GROSS_MARGIN}}%
Margin vs. target (28-35%)	{{ON TARGET / ABOVE / BELOW}}
Labor Hours (total)	{{LABOR_HOURS}}
Material Cost	\${{MAT_COST}}
Equipment Cost	\${{EQC}}
Services (labor-billed)	\${{SVC_COST}}
Soft Costs (bond, mob, ship)	\${{SOFT_COST}}

2. Cost Breakdown

Materials (Master Catalog Sheet 2)

Cost = $\Sigma(\text{qty} \times \text{Price})$ — internal GCC cost including tax + shipping per supplier invoice. Sale = $\Sigma(\text{qty} \times \text{Sale Price})$ — rolled into Base Bid Materials bucket.

Category	Cost	Sale	Margin \$	Margin %
Cable (Cat6A, fiber, coax, composite)	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Jacks, plates, patch cords	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Firestop, labels, misc hardware	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Pathway hardware (J-hook, velcro, tie wraps)	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Subtotal Materials	{{{MAT_COST}}}	{{{MAT_SALE}}}	{{{}}}	{{{}}}%

Equipment (Master Catalog Sheet 1)

Category	Cost	Sale	Margin \$	Margin %
Racks, PDUs, patch panels, housings	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Cameras, readers, intercom, NVRs	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
UniFi Managed Services hardware (if MS alt)	{{{}}}	{{{}}}	{{{}}}	{{{}}}%
Subtotal Equipment	{{{EQC}}}	{{{EQ_SALE}}}	{{{}}}	{{{}}}%

Services / Labor (Master Catalog Sheet 3)

Internal cost basis: \$65/hr foreman · \$40/hr laborer · \$52.50/hr blended 2-crew default. Billed to GC at \$100/hr flat — NEVER discloses composition on client docs.

Finance Summary
INTERNAL – DO NOT SHARE

Scope	Hours	Cost Rate	Cost \$	Billed \$	Margin %
Rough-in (P2)	{{}}	\$52.50	{{}}	{{}}	47.5%
Cable pull (P3)	{{}}	\$48.33 (3-crew)	{{}}	{{}}	51.7%
Terminate + test (P4)	{{}}	\$52.50	{{}}	{{}}	47.5%
Punch + close (P5)	{{}}	\$52.50	{{}}	{{}}	47.5%
Mobilization + MOBS	{{}}	\$52.50	{{}}	{{}}	47.5%
Subtotal Labor	{{LAB_HRS}}	—	\$ {{LAB_COST}}	\$ {{LAB_SALE}}	{{}}%

3. Margin Analysis

Bucket	Cost	Sale	Margin \$	Margin %	vs Target
Materials	{{ }}	{{ }}	{{ }}	{{ }}%	{{ }}
Equipment	{{ }}	{{ }}	{{ }}	{{ }}%	{{ }}
Labor / Services	{{ }}	{{ }}	{{ }}	{{ }}%	≥40% floor
Soft Costs	{{ }}	{{ }}	{{ }}	{{ }}%	{{ }}
OVERALL	\$ {{TOTAL_COST}}	\$ {{BASE_BID}}	\$ {{GROSS_PROFIT}}	{{GROSS_MARGIN}} %	28-35% target

Margin floor (internal only): labor ≥40% auto-achieved on any crew composition. Overall project target 28-35%. <28% requires reconsider or walk. >40% verify it's premium pricing, not a pricing error.

4. Scenario Analysis

Scenario	Base Bid	Cost	Gross Profit	Margin %	Assumptions
Best case	\$ {{BASE_BID}}	{{{ }}	{{{ }}	{{{ }}%	Fast crew · no rework · full buffer unused
Expected	\$ {{BASE_BID}}	\$ {{TOTAL_COST}}	\$ {{GROSS_PROFIT}}	{{GROSS_MARGIN}}%	Labor Plan baseline · buffer used normally
Worst case	\$ {{BASE_BID}}	{{{ }}	{{{ }}	{{{ }}%	Full buffer burned · 1 CO denied · 2 week delay

Sensitivity

- $\pm 10\%$ labor hours $\rightarrow \pm \{\{\}\}\%$ margin impact (largest driver).
- $\pm 5\%$ material cost $\rightarrow \pm \{\{\}\}\%$ margin impact.
- 1 change order mid-job $\rightarrow +\{\{\}\}\%$ margin upside (material markup rolls through).

5. Crew Bonus Logic

Crew bonus pool funded from margin above target. Paid on Substantial Completion (foreman approved, Kaitlyn approved, closeout delivered clean).

Margin % Achieved	Bonus Pool	Per Foreman	Per Laborer
< 28% (below target)	\$0	\$0	\$0
28-32% (on target)	{{ 1% of Base Bid }}	{{ {{ }} }}	{{ {{ }} }}
33-38% (above target)	{{ 2% of Base Bid }}	{{ {{ }} }}	{{ {{ }} }}
> 38% (premium)	{{ 3% of Base Bid }}	{{ {{ }} }}	{{ {{ }} }}

Bonus pool split: 60% foreman / 40% laborer on 2-crew; scales to crew size. Paid within 30 days of final pay app release. Carries no forward liability if job margin drops.

6. Reality Check vs Benchmarks

Metric	This Bid	Benchmark Band	Status
\$ / active drop (all-in)	{{{ }}	\$175-\$260 (Cat6A office/K-12/hotel)	{{IN / OUT}}
\$ / key (if hotel)	{{{ }}	\$800-\$1,200 (Marriott GPNS)	{{IN / OUT / N/A}}
Labor hrs / drop	{{{ }}	1.05 (BICSI conservative)	{{IN / OUT}}
Overall margin %	{{GROSS_MARGIN}}%	28-35% target	{{IN / OUT}}
Labor-only margin %	{{{ }}%	≥40% floor	{{IN / OUT}}

Sources: BICSI TDMM 14th Ed · NECA MLU 2021-22 · RSMeans 2024 Div 27 15 13 · Marriott GPNS v4.1 · MO AWO 32. Any metric OUT of band requires documented audit in `Internal/Processing/` before submission.

7. Cashflow Projection

Phase	% Base Bid	Invoice \$	Retention Held 10%	Net Pay (Net 30)	Cumulative Cash In
P1 Mobilization	10%	{{ }}	{{ }}	{{ }}	{{ }}
P2 Rough-in	30%	{{ }}	{{ }}	{{ }}	{{ }}
P3 Cable pull	30%	{{ }}	{{ }}	{{ }}	{{ }}
P4 Terminate / test	20%	{{ }}	{{ }}	{{ }}	{{ }}
P5 Punch / close	10%	{{ }}	{{ }}	{{ }}	{{ }}
Retention Release	—	—	\$ {{RETENTION_TOTAL}}	{{ }}	{{ }}

8. Action Items & Approvals

- Kaitlyn review + sign-off before proposal packet merge.
- Nathan crew loading sanity check against Labor Plan.
- If margin <28%: escalate to Kaitlyn for go/no-go.
- If any reality-check metric OUT of band: document audit in `Internal/Processing/` and re-run before submission.
